Autism Ontario

Challenge 1: Create a user-friendly solution that can manage Autism Ontario memberships and events.

Autism Ontario is currently in the process of creating a new website that will merge all their old databases together into one master database. The new site will be built using **Drupal 8**. They are looking for innovative solutions to help them manage information while being easy to on-board new staff.

Profile File should include:

- User Type
- First Name
- Last Name
- Gender
- Email
- Address
- City
- Postal Code
- Phone Number
- Date Joined
- *First Name of Child with ASD*
- *Last Name of Child with ASD*
- *Date of Birth of Child with ASD*
- *Date of Birth of Parent*
- Language(s) Spoken at home
- Member of Autism Ontario?
 - If yes, membership #
- Lead Staff
- Interactions
 - Phone Calls
 - Emails
 - Meetings
 - Events Attended
 - Events Attended Notes

Event System should include:

- Type of Event
- Location
- Date
- Chapter Lead
- Attendee List

Ideal Features:

- Custom Report Generating/Queries
- User Types - Tags (Clients-Child, Clients-Adult, Guardian, Volunteer, Staff, Professionals, Donors, Members)
 - Should be able to be multiple types
 - Should be able to "graduate" to different types based on criteria (i.e date of birth)
- Initiate e-mail communication
- User-Friendly Dashboard for Staff
