Sistering

Challenge 2: Create a solution that enables the public to donate physical items to Sistering.

There are many needs for physical items among the clients that Sistering serves, and there are many eager donors who want to donate needed items. The challenge can be making a match between what is donated and what donations are needed. This solution should improve the understanding of what items are needed, and allow donors to donate those items easily.

Donations Items & Ways to Give

Once donors drop items off at Sistering, staff are responsible for receiving, organizing and maintaining inventory and getting items into the hands of those that need them.

Sistering wants to curate the types of products that are donated so that they can maintain inventory of items that are needed, and minimize types of donations that are in lesser demand. Ideally, there would be a platform that could integrate with other service providers, where wish lists could be generated and maintained.

Ideal Features:

- Supports variety of items including clothing, toiletries, etc.
- Prioritizes needed items and reflects current inventory
- Integrates with Wordpress (currently platform used by Sistering)
