

## CEE

**Challenge 3: Create a solution that enables CEE to collect, manage and report on data from program partners.**

Each program that CEE offers to clients is co-facilitated and co-managed by a third party organization responsible for either technical skills training and/or employment placement. CEE doesn't have access to the databases of the program partners but needs to report on program data to funders (government, etc.).

### Ideal Features:

- Demographic data
- Case notes
- Attendance track record
- Track coaching sessions attended by each member
- Track resources delivered by each third-party organization
- Referral to external community resources (ex. for mental health, housing, etc.)
- Employment reporting
- Track CEE alumni to determine program impacts
- Crisis situation (ex: death, child care issues, etc.)
- Import from excel/csv
- Query fields
