## Kids Help Phone

**Challenge 5: Create a data-driven solution that demonstrates the impact that Kids Help Phone has on Canadian Youth.**

Kids Help Phone has a goal to provide every young person in Canada with the support they need in the way they need it most. As an organization, they have demonstrated dynamic services that have evolved over time to facilitate reflect the current needs of Canadian young people facing mental health challenges.

Demonstrating the impact of their work is complex and multifaceted. The solution should not only exemplify how well each service is currently operating, but it should also collect data so that impact can continue to be updated in real-time.

### Ideal Features:

- Dashboard
- Live info – real time counters
- Issue info – how common are particular mental health
- Stats of impact
- Demographic: Geography, gender, age, number of kids, etc.
